Sanjay Singh Rawat

Full Stack Developer

ssr911999@gmail.com | +91-8847465410 | LinkedIn | GitHub | Portfolio

Technical Skills

Languages & Frontend: JavaScript ES6+, TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST API Design, Secure Auth & Web Security vulnerability

Databases & Cloud: MongoDB, Mongoose, Redis, Cloudflare, AWS (S3, CloudFront, EC2, IAM, ACM)

DevOps & Tools: CI/CD Pipelines, GitHub Actions, PM2, Nginx, Stripe & Razorpay, Postman, Vercel

Work Experience

Frontend Developer Intern Sep 2022 – Sep 2023

National Fertilizers Limited | React.js, TypeScript, Tailwind CSS *Bathinda, India*

- Delivered UI screens for 3+ enterprise modules, improving navigation speed and reducing user effort by **20%**.
- Created reusable React components, reducing repeated UI logic by **25%** across modules.
- Refined layouts using TypeScript and Tailwind CSS, lowering visual inconsistencies by **30%**.
- Collaborated with a 4-member engineering team to resolve UI issues and optimize workflows across modules.

Projects

Cloud Storage Application | | *React, Node.js, Express, MongoDB, AWS (S3, CloudFront), Redis*

- Built a cloud storage platform supporting secure file uploads and retrievals using AWS S3.
- Reduced file delivery latency from **300ms → 100ms** via CloudFront CDN, cutting load time by **66%**.
- Enforced RBAC and Redis-backed session handling, improving API responsiveness by **50%**.
- Developed modular APIs with Express + MongoDB providing real-time storage metrics for active users.
- Applied OAuth (Google/GitHub) and Razorpay billing flows to support premium storage tiers.
- Benchmarked Redis vs MongoDB using Node.js; Redis delivered **7x–10x faster reads**, guiding caching strategy for high-frequency API calls.

Shopee E-commerce Application | | *Next.js, Node.js, Express.js, MongoDB, Tailwind CSS*

- Built a guest and authenticated session cart system allowing users to add items without login and automatically merge carts after authentication.
- Developed product search with real-time suggestions and keyword highlighting to improve product discovery and user navigation.
- Implemented client-side pagination and modular UI components for scalable and responsive product listings.
- Built secure REST APIs using Express and MongoDB with rate limiting, throttling, Zod validation, DOMPurify, CSP and Helmet to protect against common web vulnerabilities.

Custom CI/CD Server | | *Node.js, Express, GitHub Webhooks, Bash, PM2, SSH*

- Engineered a self-hosted CI/CD server using GitHub Webhooks and Node.js that **eliminated manual SSH deployments entirely**, reducing average deploy time from ∼**15 minutes** → **under 60 seconds** (a **93% reduction**).
- Implemented HMAC-SHA256 signature verification on every incoming webhook payload, blocking unauthorized requests and **securing the deployment pipeline against spoofed pushes**.
- Built intelligent **repo-aware routing** that automatically selects the correct deploy script (`deploy-frontend.sh` vs `deploy-backend.sh`) based on the triggering repository, supporting **multi-project deployments from a single server**.
- Automated **success/failure email alerts** to the committing developer, delivering color-coded HTML reports with filtered deploy logs, branch, commit message, and timestamp within seconds of process exit.

Education

Govt. Rajindra College (Punjabi University, Patiala) Bathinda, Punjab

B.Sc. Computer Science (80.25%) *2019 – 2022*

Kendriya Vidyalaya No. 5 Bathinda, Punjab

Class 12th (65.4%) *2017 – 2018*

Rose Mary Convent School Bathinda, Punjab

Class 10th (CGPA 9.8) *2015 – 2016*
